

Learn Adobe Dreamweaver CS4 by Video

Core Training in Web Communication

This complete training program offers 12 hours of video instruction and a 120-page printed guide to teach you the fundamentals of Adobe Dreamweaver CS4 as well as the basic principles of web design. You'll master the program's interface and learn how to use essential commands and tools to design websites that combine type and images with rich media. Quizzes round out each chapter to reinforce what you've learned.

Trainer: **Candyce Mairs, Ruth Stryker**

USD 59.99

This innovative product from Adobe Press combines interactive video and a printed reference to teach you the basics of Dreamweaver CS4. Structured around the objectives of the "Web Communication using Adobe Dreamweaver CS4" exam at the Adobe Certified Associate level, the product teaches you not only the fundamentals of Dreamweaver, but also how to use the program to create effective forms of Web communication. You'll get 12 hours of video, presented by experienced instructors, as well as lesson files (so you can follow along), assessment quizzes and review materials. The DVD is bundled with a printed booklet that provides a topic-by-topic guide to the video. The video is wrapped in a unique interface that allows the viewer to jump to any topic, and to bookmark individual topics for later review. Project files used in the lessons are included on the disk so the students can practice what they've learned, and review questions help to reinforce freshly gained knowledge.

The video presents basic principles of Web site design, including copyright, project planning and management, meeting accessibility standards, and file formats. Building consistency into Web site design and interaction are taught, using CSS styles, and tools for managing multiple pages in a site, such as storyboards, wireframes, and site maps are introduced. Most of the video is devoted to fundamentals of Dreamweaver CS4, introducing the user to the program's interface, how to use essential tools and commands, and how to use the Insert panel and the Assets bar. Create Web pages, import images and add text, style text and add hyperlinks. More advanced topics include using CSS rules to establish page layout, styling text, and maintaining a site.

Requirements:

- Broadband internet connection
- Up-to-date browser with Flash plug-in
- Screen resolution 1024x768 or higher
- Sound card with speakers or headphones attached
- Pentium 4 2.6 GHz or higher, or Apple Mac G5
- 512 MB RAM

Table of Contents

HTML Refresher

▶ URL Overview	01:53
▶ HTML Introduction	01:38
▶ Basic HTML Tags	07:52
